True BusinessID™ [formerly eBusinessID]

Customer Success

"My new certificate worked great! Incredible turn-around time, too. You guys rule."

**Mike Cross
fcg networks**

Comprehensive solutions for a secure e-enterprise. If you're looking for end-to-end coverage for all your Internet security needs, True BusinessID™ from GeoTrust is the answer. This bundled package of SSL and True Site™ delivers unsurpassed browser and server recognition as well as airtight access protection and fraud prevention — all at one affordable low price.

True BusinessID is the first 2nd generation web trust solution that combines state-of-the-art 128-bit SSL encryption and identity verification in a single easy-to-use package. That means a new level of online security for both you and your customers, and a corresponding increase in business activity and revenue generated by your web site.

Installing True BusinessID is hassle-free, too. We'll provide easy-to-follow online installation instructions that will get True BusinessID up and running quickly and easily — and offer interactive technical support any time you need it.

We'll even notify you of renewal requirements in advance so you can be sure that your True BusinessID is always operating at optimal levels — seamless protection for your online business, and important 24x7 assurance for your customers.

Only GeoTrust True BusinessID offers these important features:

- "Smart Icon" technology that displays company identity and embedded "real-time" date/time stamp
- Fast and easy online purchase and installation
- 98% consumer web browser recognition
- Secure online protection at half the cost of competitive products
- Special "Wildcard" multiple-server offer
- Advanced 128-bit encryption technology
- 1024-bit length support

GeoTrust, the leading provider of 2nd generation Internet trust services.

Providing secure e-commerce transactions, identity verification and authentication solutions to the global web community, GeoTrust delivers a new level of e-business security — your first step toward leveraging the full business potential of the Internet.
